Forgotten Carols Synopsis

By Michael Mclean

This is a play with several different stories within the story of the First Christmas. It is told by some very unlikely characters. There's the Inn Keeper, who turned the holy family away. And a shepherd who fell asleep with his flock and missed the events of that magical night— only to be told about it the next day. There is a childless woman who gets to hold Mary's baby, and a wounded WWII soldier spending Christmas in the hospital. We also meet a New York City cab driver who is working the holiday. And it is all tied together by a nurse who is assigned to care for an elderly man who claims to have known all these people first hand as he has lived, by his word, over 2000 years. It is a lovely story with a heart warming message and many beautiful songs— never heard before...The Forgotten Carols!
